## THE SMOOTH SKIN SYSTEM™

As the next generation of non-surgical skin remodelling, this unique system draws on the power of multiple energy sources and simultaneously combines innovative and scientifically proven technologies.

[More Information](#)

## The Smooth Skin System™

For Younger & Smoother Looking Skin! New advances in skin remodeling technology provide true, non-surgical facial rejuvenation (for Men & Women). The Smooth Skin System is a revolutionary skin rejuvenation treatment that effectively encourages the production of new collagen in the various layers of the skin, replacing aged and sun damaged collagen, plumping the skin, smoothing wrinkles, and toning the skin and muscles.

The Smooth Skin System is the first of its kind to provide an innovative remodeling treatment that delivers truly outstanding results by combining **the synergy of 5 scientifically proven technologies**. This remarkable system addresses each problem at its source!

1. **Encouraging Cell renewal**, and the growth of healthy new skin.
2. **Activating neo-collagen production**, restoring volume and elasticity to the skin, while plumping wrinkles.
3. **Relaxing dynamic lines**, softening the areas of the facial expression such as crow's feet, worry lines and lip wrinkles.
4. **Tightening the skin**, to a youthful smoothness and tautness.
5. **Redefining the facial contour**, Redefining the facial contours for perfection

The BEST thing about this Smooth Skin treatment is that it can truly help those seeking a more youthful appearance achieve their goal of looking as young as they feel.

## **AGING PROCESS AND WRINKLES**

Day to day, our face is the first thing people notice. As we age, it is often the first area to show signs of aging. What contributes to premature facial aging and what makes us look old? More importantly, can we reverse the process?

Several factors contribute to facial aging. Some of the most obvious extrinsic influences are well known and include environmental factors, nutrition, chemicals we use on or around our face, whether or not we moisturize, weather and smoking, to name a few. These all accelerate the formation of wrinkles around the eyes, mouth, and forehead, as well as promote sagging skin, age spots and redness.

Intrinsic factors are associated with the natural aging process and are therefore unavoidable. As we age, our cells become less efficient. Metabolic processes slow, causing deterioration in three distinct skin layers; the epidermis, the dermis and the muscle tissue beneath.

The good news is that these things can be treated, and in many cases largely reversed. By combining scientifically based technologies during treatment, we are able to improve a wider range of age-related issues.

### **WHAT IS THE SMOOTH SKIN SYSTEM™?**

The Smooth Skin System™ integrated 5 non-invasive technologies designed to restore the skin's metabolic functions, taking years off the appearance of the skin, without having to resort to painful surgical procedures.

During the Smooth Skin treatment procedure, energy is directly transferred to the cells. Scientific research has shown that issues can be stimulated and reprogrammed to resume their natural youthful functions.

### **HOW DOES SMOOTH SKIN SYSTEM WORK?**

A Smooth Skin System treatment involves combining several widely recognized “age reversal” technologies.

- Waves of energy produced by the system gently vibrate and heat the tissue, reorganizing the skin's scaffolding and stimulating new collagen production. The effect tightens and rejuvenates the skin in the targeted area.
- Frequency-Specific Microcurrents are simultaneously transferred through the skin layers, improving muscle tone.
- Through the simultaneous application of all the technologies, the Smooth Skin treatment delivers unparalleled synergy in a single, 30-minute treatment.

## **HOW WILL I FEEL DURING THE TREATMENT?**

Prior to treatment, a “Smooth Skin” gel is applied on the skin. The gel consists of nutrients known to boost collagen regeneration. During treatment, cutting-edge technologies are combined to ensure penetration.

During the treatment, you will feel relaxed and comfortable.

Unlike IPL or laser treatments which rely on thermal damage, the Smooth Skin System™ is non-invasive and totally natural. Individuals with sensitive skin may experience a lingering warmth or mild redness on the treated area which will fade within a few hours. Since there is no recovery time required, you can receive a treatment and go back to work or resume your activities immediately.

## **HOW QUICKLY SHOULD I EXPECT TO SEE RESULTS?**

You should notice an improvement in the texture and tautness of your skin immediately after the first treatment. Results are gradual. It can take 4-6 weeks for the skin’s natural collagen renewal process to fully take effect.

A series of treatments will take years off the appearance of your skin and will leave you with younger looking skin, fewer lines and wrinkles, improved skin elasticity and noticeably redefined facial contour.

## **HOW MANY TREATMENT WILL I NEED?**

Age, lifestyle and skin condition will determine the number of treatments required. During the consultation, we will conduct a thorough analysis of your skin to determine the number of sessions you will need.

While clients usually report a visible improvement after just one treatment, a series of corrective treatments is recommended to achieve lasting results.

### Smooth Skin Treatment

Time: 30 Min Price: \$157

### Smooth Skin Treatment with Mask

Time: 45 Min Price: \$177

### Smooth Skin Packages

06 sessions \$882

08 sessions \$1136

10 sessions \$1370

Add on Treatment for \$57!

## **HOW LONG WILL RESULTS LAST?**

Healthy Lifestyle choices allow us to keep our bodies fit and maintain optimum energy levels. To fight the signs of aging, it is important to incorporate a fitness routine for our skin as well as our body.

Once the initial series of treatments is completed, monthly maintenance and a good skin care regimen are enough to enhance and maintain long-term results.

### **A Dynamic Approach to Treating Aging Skin**

The Smooth Skin System™ provides your skin care professional with the necessary tools to slow, and even reverse some of the signs of aging, all without having to resort to painful procedures, downtime or irritating side effects!

\*Individual results may vary

#### **Results are usually visible after only one treatment:**

- Fine lines and wrinkles are noticeably softened
- The facial contour is redefined and toned without any adverse effects
- Skin tone is exceptionally radiant

### **The Smooth Skin System™ is the next generation of facial remodeling procedures.**

Silhouet-tone has combined 5 scientifically proven technologies into one facial remodeling program in an effort to specifically address the most important factors associated with facial aging and to provide effective, non-surgical facial rejuvenation. The system, powered by STD (Synchronized Technology Delivery) System targets the underlying problems associated with skin aging and generates results in the dermis and muscles. During treatment, the Synchronized Technology Delivery treatment head draws on the power of multiple energy sources and simultaneously combines innovative and scientifically proven technologies that consist of Frequency Specific Pulsatile Currents (FSPC), Ultrasound, Impulse Micro-Currents, Electroporation and Iontophoresis. This five tiered approach works with the body to simulate new collagen growth, tone sagging muscles and tighten the skin. The Smooth Skin System targets all layers of the skin for younger, natural looking results that last. This system has a valuable tool that allows practitioners to offer “Combination Therapy” to its clients. By combining a variety of safe and effective technologies with fillers and cosmeceuticals, outstanding results can be achieved in less time. This case report will review our experience with multiple combined therapies. The objective of this case report is to review the superior results achieved with the Smooth Skin system (Silhouet-Tone Ltd).

## **Clinical and Photographic Scoring of Skin Aging**

Chronic exposure to sunlight induces clinical, histological and physiological changes that are described as photoaging. To assess the resulting skin changes, the “Glogau” classification system is used. This grading scale is particularly useful to improve the quality of our clinical studies and assessment of photo damage skin.

## **Case Study**

Participants (identified with number) were between 38 and 61 years of age. It is important to carefully select patients and to set realistic expectations in order to achieve a greater likelihood of success.

These case studies represent combination therapy treatments performed on a wide range of participants. The majority was satisfied with results, did not experience any adverse reactions and was not inconvenienced by down time.

Tests started in late August and ended in October 2009. Participants therefore had remnants of summer tans in the “before” treatment pictures.

## **Treatment Protocol**

The participants were asked to sign a consent form and provide a detailed medical history to make sure there were no contraindications. The skin was cleaned and photographed with a Nikon Digital camera (11 Mega-pixel). Microdermabrasion, using corundum crystal, was only performed as part of the first treatment.

## The power of 5 "Age Reversal" technologies

This unique ergonomic treatment head combines five proven "Remodelling" technologies, delivering them simultaneously through a single treatment head, providing a remarkably effective treatment in a fraction of the time.

- **The power of 5 "Age Reversal" technologies**
- **Delivered through one treatment head simultaneously**
- **In just one 30-minute treatment**

**\* Only available in the United States**

THE SMOOTH SKIN SYSTEM™ is the first to offer an innovative proprietary remodeling treatment by combining the synergy of five scientifically-proven technologies, for outstanding results.

The SMOOTH SKIN System™ is a revolutionary new skin rejuvenation system that effectively stimulates new collagen growth in the deeper skin layers, replacing aged and sun damaged collagen, plumping the skin, smoothing wrinkles, tightening skin and muscles.

People of all ages, from teenagers to elders, whether Man or Woman can receive treatments with the Smooth Skin system and enjoy a range of awesome benefits:

- Stimulate cell renewal and the growth of new healthy skin.
- Activate neo-collagen production restoring volume and elasticity to the skin, while plumping wrinkles.
- Relax dynamic lines erasing the areas of facial expression such as crow's feet, worry lines and lip wrinkles.
- Tighten the skin to a youthful smoothness and tautness.
- Restore muscle tone by redefining the facial contour, lifting the cheeks and tightening the jawline and neck.

As the next generation of non-surgical skin remodeling, this really unique smooth skin system draws on the power of multiple energy sources and simultaneously combines innovative and scientifically proven technologies.

How can this amazing system work for you?

Well, technically speaking, its all in the “head”!

#### SYNCHRONIZED TECHNOLOGY DELIVERY™

The simultaneous combination of five proven “remodelling” technologies in a one of a kind, ergonomic treatment head produces remarkably effective results in only a fraction of the time. Several devices currently on the market only achieve partial results through the use of one or two similar technologies. It therefore comes as no surprise that the Smooth Skin System has outdone the competition by combining 5 remodelling technologies to help clients achieve a natural, more youthful appearance without the use of invasive procedures.

The STD™ system uses a computer assisted program located in the treatment head to skilfully deliver the most suitable treatment protocol, at the appropriate intensity, for the optimal length of time.
